Drawings

1. The drawings are objected to because as mentioned at page 5, lines 1 and 3, and page 6, line 7, numeral 24 is not labeled in any figure. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities: As described in the brief description for Fig. 7, "line 7-7" is not shown in Fig. 2. Page 7, lines 21, 22 and 25, numeral 76 refer to both a rim and a lip. Page 8, line 1, a term "rim" should be entered before numeral 76. Page 8, line 3, rear section should refer by numeral 74 and front section should refer by numeral 72. Page 8, line 6, the phrase "loops 45, 47 are positioned between the hem and the hem" is unclear. Applicant is advised to thoroughly check the specification for such errors prior to submitting the response to this office action. Appropriate correction is required.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-8 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-8 of U.S. Patent No. 6,412,343. Although the conflicting claims are not identical, they are not patentably distinct from each other because the applicant admits that the band may comprise an alternative band element comprising a non-elastic wrapped band of braided cord. Thus the instant inventive silicon rubber ring is nothing more than an alternative for the non-elastic band of the above mentioned patent to Jefferson. Furthermore it would be inherent to modify the structure of the cover to mount the cover onto the pitot tube. Such modifications would be within the scope of an individual in the art.
